Rahul Vs War of Words Within The Alliance!

Direct Voice National Bureau Chief New
Delhi September 24:

Different voices be tween Samajwadi Party and Congress leaders ahead of UP elections MP Iqra Hassan defends Akhilesh's leadership Congress MP Imran Masood says it is not possibleTwo parties won 3 Lok Sabha seatsAgreement still not reached on seat distribution in KalloAhead of the assem bly elections, a discussion has started on the leadership of the Samajwadi Party and Congress alliance. Although the top leaders of both parties are positive about continuing the alliance, the comments made by the MPs of the respective parties have led to a political debate. While Samajwadi Party MP Iqra Hasan mainly mentioned Akhilesh Yadav's role in confronting the BJP in Uttar Pradesh, Congress MP Imran Masood emphasized the importance of Rahul Gandhi. With this, the issues of leadership and seat sharing in the alliance ahead of the 2027 elec tions have once again come to the fore. 'Not possible without Akhilesh' Kairana MP Iqra Hassan on Tuesday said that Samajwadi Party president Akhilesh Yadav is key to taking on the BJP in Uttar Pradesh. She opined that the Congress has not achieved much alone. However, she also said that if the two parties work together, their strength will increase. Her comments have led to a debate on the role of the Samajwadi Party in the alliance.Rahul's role cannot be ignored'Saharanpur Congress MP Imran Masood responded to Iqra Hasan's com ments. He said that Rahul Gandhi is act ing as the voice of the opposition across the country and his efforts cannot be ig nored. He believed that it is not possible to face the BJP in Uttar Pradesh without the Congress. Masood has already asked the two parties to take a quick decision on seat sharing. He previously worked in

the Samajwadi Party and is currently rep resenting the Congress in the Lok Sabha. A total of 43 seats in the last electionIn the 2024 Lok Sabha elections, the Samajwadi Party and the Congress con tested together in Uttar Pradesh. The two parties won 43 seats out of the total 80 seats in the state. The Samajwadi Party won 37 seats and the Congress six seats. The Samajwadi Party also won the Faizabad Lok Sabha seat, where Ayodhya is located. In the wake of these results, top leaders of both parties made posi tive statements on the issue of continu ing the alliance in the 2027 assembly elec tions as well. There is still no clarity on seat distribution.No final agreement has been reached yet on how many seats each party will contest in the upcoming assembly elections. While Congress MP Imran Masood wants the seat-sharing to be finalized soon, Samajwadi Party lead ers say that Akhilesh Yadav and Rahul Gandhi will take decisions related to the alliance. In this context, mutual com ments by MPs of the two parties have caused political debate in the run-up to the elections. However, there has been no official announcement so far about dif ferences arising between the top lead ers on the continuation of the alliance.

Defense Department makes huge deal with BDL

Dayyala Rakesh
Bhanu Direct Voice
Bureau Chief New
Delhi September

24: The Defence Ministry on Wedne sday signed a deal with Bharat Dynam ics Limited (BDL) for the purchase of satellite based smart anti-airfield weapons that can destroy targets on the ground from the sky with high preci sion. Under the Rs 810.79 crore deal,

BDL will supply 160 SATASAAA precision guided bombs to the Air Force between 2027-29. These will be fitted on the Jaguar, Hawk and ACU-30 MKI fighter aircraft of the Air Force. The deal was signed in the presence of Defence Secretary Rajesh Kumar Singh. The bombs are manufactured by DRDO While doing so, BDL is producing them. These can destroy en emy bases on the ground with great precision. Since they can be launched from a distance of 90 to 100 kilometers, our planes can attack without being detected by enemy radars.

FRIDAY 25 SEPTEMBER, 2026

Udayanidhi Criticism Of The Barrage

We have seen all kinds of outrageous speeches, provocative speeches, and outbursts against Sanatana Dharma when in power. This is the background of DMK leader Udhayanidhi Stalin. In any case, protests have been expressed across the country over the way he spoke. While holding power as Deputy CM, he started speaking against Sanatana Dharma. Actor Prakash Raj is a scapegoat for such people. Udhayanidhi's recent comments have created a stir in Tamil Nadu. He was arrested for his comments on Trisha Krishnan and released on bail by a court order. However, this does not mean that he will reduce his outrageous speech. A person who has served as Deputy CM should be somewhat restrained. If that is all, then it is not possible to speak as much as he wants. Udayanidhi's politics are aimed at fueling the political credibility earned by grandfather Karunanidhi and father Stalin with controversial comments. Criticism and counter-criticism between leaders are common in the political history of Tamil Nadu. However, it is worrying that Udayanidhi Stalin, the leader of the opposition who should be fighting on public issues, is going into personal matters. There is a possibility that such comments by Udayanidhi Stalin, who should be fighting on public issues, will tarnish his image. From Sasikala to today's Trisha comments, his style of behavior is raising questions about morality in politics. Everyone has openly criticized that it is not the right way to engage in personal attacks without talking about political points in protests. It remains to be seen what kind of political price these controversial comments will make the DMK party pay in the coming days. However, criticism is natural in politics. But only leaders like Udayanidhi Stalin have proven that it is possible to stoop to a personal level and speak out against women. Tamil Nadu was shocked by his comments on actress Trisha. But he is not new to saying such things. Udhayanidhi Stalin, who has recently spoken out against Sanatana Dharma, used to say whatever comes to his mind in the past. During a protest organized in Thanjavur on the issue of Cauvery water distribution, Udhayanidhi Stalin severely criticized the government and Chief Minister Vijay. He accused Vijay of giving priority to political partisanship against DMK instead of solving people's problems. While Udhayanidhi was speaking, DMK workers started chanting actress Trisha's name. Responding to this, Udhayanidhi said that it is okay if water does not reach our area, but it is his idea to reach there, which gave a double meaning. These comments went viral on social media. Many politicians, including former Governor Tamilisai Soundararajan, strongly condemned this. They are criticizing him for insulting women with such vile words. This is not the first time that Udhayanidhi Stalin has targeted women opponents' personal lives. He has been in the news for a series of controversial comments even before he became an MLA. He made harsh comments against the then Chief Minister Palaniswami during the 2021 assembly election campaign. He made sensational comments that Palaniswami crawled like a corpse to grab Sasikala's legs. After the video of this speech went viral on social media, AIADMK leaders objected. A defamation case was also registered against him. There was criticism that speaking in a way that degrades women leaders and political opponents has become his style. Udhayanidhi has not reduced the intensity of his comments after the Vijay-led TVK came to power. In addition, he is unable to bear the loss of power. At a media conference, he directly targeted Chief Minister Vijay through his ex-account post. He commented that it is inappropriate to tell a story that tarnishes the dignity of the Assembly. He made personal comments saying that the whole of Tamil Nadu.

CP Reviews Ganesh Immersion Security in Bodhan :

Nizamabad Bodhan, September 23, 2026 : Nizamabad Police Commissioner P. Sai Chaitanya, inspected the security arrangements made for the Ganesh idol immersion at Pasupu Vagu in Bodhan Police Station limits.

The immersion programme was conducted peacefully at the designated immersion point established by the police department at Pasupu Vagu. Elaborate security arrangements were made to ensure the safety and convenience of devotees and Ganesh festival committee members, while preventing traffic disruptions.

During his visit, the Commissioner inspected the immersion site and reviewed

the arrangements with police officers and personnel deployed on duty. He directed them to remain alert and ensure that the immersion proceedings were conducted peacefully without any untoward incidents.

Sai Chaitanya instructed the police to provide necessary assistance to devotees and pay special attention to traffic regulation, security measures and crowd management at the immersion venue.

He also appealed to the public to cooperate with the police department and extend support in maintaining peace and law and order during the Ganesh immersion celebrations.

Bodhan ACP Srinivas, Bodhan SHO Venkat Narayana, Municipal Floor Leader Sharath Reddy, Municipal Commissioner Jadhav Krishna, Deputy Executive Engineer A. Yogeshwar and others participated in the inspection.

Hyderabad Art Week to Make Debut From October 26

Hyderabad : Hyderabad Art Week will make its debut from October 26 to November 1, with four city galleries planning a seven-day programme of contemporary art across Hyderabad.

The week has been founded by Bhargavi Gundala of Dhi Contemporary, Supraja Rao of Kadari Art Gallery, Rekha Lahoti of Kalakriti Art Gallery and Lakshmi Nambiar of Srishti Art.

Rather than follow a conventional exhibition calendar, the organisers have planned "seven days, seven distinct encounters" that will move between artist studios, galleries and other spaces in the city.

The programme will include studio visits, gallery conversations, talks, performances, curated walkthroughs, collector gatherings, open studios and heritage experiences.

Galleries will also remain open after dark during

Hyderabad Art Night, while the organisers plan to involve students, emerging artists, curators, collectors, designers, entrepreneurs and the wider public.

Unveiling the initiative, culture minister Jupally Krishna Rao said Hyderabad had "a tremendous history of art and culture" and that the government was happy to support initiatives that kept that heritage alive.

He also praised the four participating galleries for their work in art and public engagement.

The founders said the week would give people more opportunities to "discover art, meet artists, exchange ideas and engage with the cultural life of the city," and they hoped it would become an annual date on Hyderabad's cultural calendar.

The newly unveiled identity takes inspiration from Urdu letterforms and isometric geometry, using geometric forms with red and blue accents.

Organisers said the full programme, participating artists and collaborations would be announced shortly.

Doorstep Meeseva Services Rolled Out Across Telangana

HYDERABAD: Telangana residents can now book select MeeSeva services for delivery at their doorstep through the 1100 toll-free number or the MeeSeva portal. Citizens can choose a slot and receive services at home, including birth and death certificates, income, caste and residence certificates, and copies of Encumbrance Certificates. Select police departments and IGRS services are also part of the facility.

More than 70 MeeSeva agents and VLEs have been specially trained to provide the doorstep services, according to IT minister D. Sridhar Babu who launched the service on Wednesday. He said the service would begin in the CURE region before being extended statewide.

The minister also said the government was introducing technology-driven reforms to improve transparency, accountability and the delivery of public services. Telangana was working to combine technology with governance and become a "role model in digital governance" by taking citizen services directly to people's doorsteps, he said, adding that the government wanted technology to make public services more accessible, transparent and accountable to citizens.

ITE&C joint secretary Anudeep Durishetty, MeeSeva commissioner Ravi Kiran and TGTS managing director Satyanarayana Reddy were among those who attended the programme.

BRS to send six teams to Telangana power plants amid shortage: KTR

BRS working president KT Rama Rao announced that six party delegations will visit thermal power stations and Singareni headquarters across Telangana on Thursday. The teams will assess generation, coal supplies and shutdowns amid allegations of a power shortage.

Hyderabad: Amid a heightening power crisis, six BRS delegations are scheduled to visit thermal power stations across Telangana on Thursday to assess the ground-level situation and ascertain the reasons for the power shortage and shutdown of generation units. BRS working president KT Rama Rao made the announcement on Wednesday, demanding that the Congress government not obstruct them, unless it was misleading and hiding facts from the people of the State.

The teams will cover Yadadri Thermal Power Station (YTPS) at Damaracherla, Kothagudem Thermal Power Station (KTPS), Bhadradi Thermal Power Station at Manuguru, Kakatiya Thermal Power Project (KTPP) at Bhupalpally, Singareni Thermal Power Plant at Jaipur in Chennur and the Singareni headquarters in Hyderabad.

"These are all public properties. If the government has nothing to hide, it must allow our elected representatives in," Rama Rao asserted. He attributed the severe power shortage to a coal shortage at Singareni Collieries Company Limited (SCCL). He demanded restoration of 24-hour power supply to farmers and said the six teams would place their findings before the public before deciding the party's further course of action.

He said the government was unable to supply more than six hours of power to agriculture despite claiming 24-hour supply. Rejecting Energy Minister Mallu Bhatti Vikramarka's explanation linking the shortage to El Nino, he said, "This is not El Nino. This is El Congo, a creation of the ruling Congress affecting the State."

The BRS working president said YTPS, with 4,000 MW capacity, was generating only about 400 MW due to coal shortage, while a 270-MW Bhadradi unit had shut down. Hydel units were also affected due to inadequate water availability, he said.

He stated that Singareni was supplying lower-grade G13 and G14 coal to Telangana plants while its best coal was being supplied to other States. Quoting a senior Singareni official, Rama Rao said the State government owed the company Rs 52,000 crore through GENCO. He also cited multiple news reports that poor-quality coal had caused an estimated Rs 2,900-crore loss to the State exchequer.

Rama Rao reiterated that 40 lakh tonnes of coal had gone missing from Singareni, involving an alleged Rs 1,600-crore irregularity. He questioned why thermal plants were shutting down and coal stocks were reportedly reaching zero if the coal was available. He said Singareni's production had fallen from 70 million tonnes in 2023-24 to 58 million tonnes in 2025-26.

Contrasting the situation with the previous BRS regime, he said nearly 20,000 MW of generation capacity had been created and the State achieved around 91 per cent PLF. He also pointed out that farmers from Chief Minister A Revanth Reddy's native Kondareddy were staging a road blockade over power supply and that growing numbers of industrialists were telling him that 30 per cent of their industrial requirement was being met through generators. Geographic Reference

Six BRS teams inspecting power plants:

- The YTPS team, led by former Energy Minister G Jagadish Reddy and Nalgonda leaders, will examine why Units 1 and 2 were shut down and why some units were not operating at full capacity.
- The Kothagudem team, led by Rajya Sabha floor leader Vaddiraju Ravichandra and Khammam leaders, will examine coal supplies, generation and plant load factor.
- Former Minister Puvvada Ajay Kumar and former MLA Rega Kantha Rao will lead the Bhadradi team.
- At Bhupalpally, MLA Palla Rajeshwar Reddy, former MLA Gandra Ramana Reddy and former Ministers Errabelli Dayakar Rao and Satyavathi Rathod will inspect KTPP.
- The Jaipur plant will be visited by MLAs Anil Jadhav and Kova Laxmi, former Minister Jogu Ramanna and former MLAs Balka Suman, Diwakar Rao, Durgam Chinniah and Konappa.
- The sixth team, led by former Minister Koppula Eshwar, MLA KP Vivekananda and MLCs Dasaju Sravan and Shambipur Raju, will visit the Singareni headquarters in Hyderabad.

Lord Ganesha Immersion Marks a Spirit-Filled Celebration at Disneyland High School

I. Vijay Kumar, Direct voice Reporter, Hanumakonda, September 24: Disneyland High School, Oglapur, Damera Mandal, celebrated the Lord Ganesha immersion ceremony with devotion and spiritual fervour on Wednesday. The programme began with special prayers and worship of Lord Ganesha. The school teaching and non-teaching staff participated enthusiastically and sought the blessings of Lord Ganesha for the well-being, prosperity and success

of the entire school community. The Ganesha idol was taken in a devotional procession for immersion amid chants of "Ganapati Bappa Morya!" The ceremony created a joyful and spiritual atmosphere on the school campus. School Founders Dayyala Mallaiah, Dayyala Sadayya and Balugu Lakshminivasam, along with Board of Directors B. Shobha Rani, D. Rakesh Bhanu and D. Dinesh Chander, conveyed their wishes for peace, prosperity and happiness to the Disneyland High School family. The students and staff members participated in the ceremony with devotion and enthusiasm, marking the conclusion of the Ganesha festival on a spiritual note.

UGD land acquisition process should be completed Quickly District Collector, Baldia Special Officer Chahat Bajpai

Dayyala Rakesh Bhanu Direct Voice Bureau Chief Warangal September 24: Hanamakonda District Collector and Greater Warangal Municipal Corporation Special Officer Chahat Bajpai has instructed the officials to take steps to complete the land acquisition process related to Underground Drainage (UGD) in Greater Warangal city expeditiously. On Thursday, the Collector held a review meeting with officials of Revenue, Municipal and other departments on the progress of the land acquisition process related to UGD in the Collector's Chamber of Hanumakonda District Collectorate. On this occasion, the Collector reviewed the land acquisition issues required for the establishment of Sewage Treatment Plants (STPs), Sewage Pumping Stations and Lifting Stations. The Collector asked the officials about the progress of the land acquisition process related to government and private lands

in a total of 23 areas in the district. Speaking at the meeting, District Collector and Greater Warangal Municipal Corporation Special Officer Chahat Bajpai said... The officials should complete the land acquisition process in a coordinated manner. He instructed the officials to complete the relevant process without any delay in land acquisition for the implementation of UGD works. Additional Collector N. Ravi, Greater Warangal Municipal Corporation Commissioner Venkanna, Hanumakonda RDO Venkatesh, SE Raj Kumar, EE Ravikumar, Tehsildars, and officials of the Land Acquisition Department participated in the meeting.

'Epuri Dandora' Against the Drug Menace: Make the September 29th Meeting Historic Yuddhanauka Dr. Epuri Somanna

Dayyala Rakesh Bhanu Direct Voice State Bureau Chief Hyderabad September 24 "All-Party Round-Table Meeting at PRTS Bhavan; Massive Turnout of People's, Student, and Caste-Based Organizations. Yuddhanauka Dr. Epuri Somanna called for collective action a 'Dandora' public clarion call to drive out the drug menace that is plaguing the youth. He spoke as the chief guest at an all-party round-table meeting held today at PRTS Bhavan in Nalgonda, aimed at ensuring the success of the 'Epuri Dandora Against Drugs' meeting. Presided over by TSEF State President Gudapuri Sanjay, the meeting saw a massive turnout of representatives from various people's movements, student unions, caste-based organizations, intellectuals, and employee union leaders. Speaking on the occasion, Dr. Epuri Somanna said: Today, the future of Telangana's youth is being destroyed by the intoxication of ganja and drugs. This is not merely a family issue; it is a societal problem. Drug trafficking is ram-

pant even near schools and colleges. While governments are taking measures, there is a need for public awareness. That is why we are organizing a massive public meeting at Gadiyaram Center on September 29th under the slogan 'Epuri Dandora Against Drugs.' This meeting will not be limited to mere rhetoric." This is a meeting aimed at taking the message of awareness to every doorstep for a drug-free Telangana. Every parent, student, and young person must participate in this event. A campaign against drugs must be proclaimed in every single village. "We all bear the responsibility of making the September 29th meeting a resounding success—one that will go down in the state's history," he said. Gudapuri Sanjay, the meeting's chairperson, stated that extensive campaigning is underway across the state for the September 29th event. He noted that the TSEF and various other civil society organizations have pledged their full support to the Aepuri Foundation's crusade

against drug abuse. He assured that the suggestions and recommendations arising from this round-table meeting would be implemented at the main event. Leaders from various participating organizations spoke about the havoc drugs are wreaking in their respective areas. They demanded that the government take stern action against drug suppliers and establish awareness programs and counseling centers for the youth. They announced that thousands of members from their organizations would attend the September 29th meeting. Finally, a unanimous resolution was passed to ensure the success of the 'Aepuri Dandora Mahasabha' on September 29th, with everyone committing to bring at least ten people to the event as part of their personal responsibility. Key participants included Aepuri Foundation senior leader Gattigundla Ravi, Paladugu Nagarajuna, KVPS District Secretary Okaram Srinu, MSP District President Medi Narasimha, TMRPS State President

Kandula Mohan, MRPS National Vice-President Pullemla Sandeep, Ambedkar Youth Association District President Aitagani Janardhan Goud, BC Association District President Talari Rambabu, and others. The event was attended by President Kattila Shivakumar; Kudutala Nagaraju (State President, SC/ST/BC/Minority Association); Anumula Suresh (State Working President, Telangana Madiga Students); Bojja Devayya (State Vice President, Swaeroes); and senior MRPS district leaders Erolla Srinu, Konda Kelish, Perika Anji, Konda Mahesh, Nikhil, Ashok, Ravi, and Paramesh, among others.

Kumkum Puja and Bangles Ceremony Held at Vinayaka Idol

Direct voice jagtial bureau kyasa gangadhar Pegadapalli, September 24: "A Kumkum Puja and bangles ceremony was held with devotion and spiritual fervour in front of the Vinayaka idol near the bus stand at Aithapalli village in Pegadapalli mandal. "The Kumkum Puja was performed seeking the blessings of Goddess Lakshmi and Goddess Parvati (Lalithambika) for marital prosperity, good health, wealth and the well-being of families. Devotees believe that worshipping the Goddess with kumkum helps dispel negative energies and brings peace and spiritual purity to the household." Divya Palumaru, Keshaveni, Manjula, Gouda Sujatha, Nithya Palumaru, Jetty Mamatha, Lokshitha, Kanukuntla Pooja, Gouda Radha, Burra Bhagya, Palumaru Vijay Yadav, Keshaveni Sanjeev, Gouda Rajesham, Haridas, Raju, Shekhar, Mallikarjun, Raju and others participated in the programme.

Chakali Ailamma Foundation Rajaka Mitra Mandal will be organizing the Veeranari Chakali Ailamma Jayanti on September 26,

Reporter Hanumakonda Sept. 24 : Chakali Ailamma Founder Ravula Sudarshan. Speaking at a press conference organized at Hanumakonda Press Club, they said that the Jayanti programs will be organized in memory of Veeranari, who united people from all sections of society and led the movement against the tyrannical rule of the Nizam in the Telangana armed struggle. Ravula Sudarshan requested that prominent people from all sections of the district and leaders of public associations participate in large numbers for this program to be successful. Chakali Ailamma Foundation State President Anjaneyulu, Poornachander and others participated in this program.

Former Minister Smt. Satyavathi Rathod Calls on Dasyam Vinay Bhaskar

Ch.Abhinay Bureau Chief Warangal September 24. Former MLA Dasyam Vinay Bhaskar sustained injuries to his leg and arm after police obstructed him while he was attempting to visit victims injured by falling ceiling debris at MGM Hospital. Former Minister and BRS Party General Secretary Smt. Satyavathi Rathod visited him at his residence in Hanamkonda, where he was resting following medical treatment. During the visit, she inquired about his health and recalled his significant role during the statehood movement. She stated, "The BRS party will always stand by you as you fight for public issues; you must continue the struggle for the people." Vinay Bhaskar explained

to her that he was injured when police assaulted him specifically kicking him in the abdomen while obstructing his path. Smt. Satyavathi Rathod emphasized that the BRS party would continue to stand with the people and fight for the resolution of public issues. Jangaon MLA Palla Rajeshwar Reddy, former Mahabubabad MLA Banoth Shankar Naik, and several other BRS leaders participated in the event.

Thirumalayapalem SI Sustains Serious Injuries in Road Accident Thumburu Dayakar Reddy Visits the Injured

T. Venkat, Bureau Chief, Khammam September 24 : Thirumalayapalem: Thirumalayapalem Sub-Inspector (SI) Kuchipudi Jagadeesh and his driver, Kothapalli Rakesh, sustained serious injuries when a lorry rammed into their police vehicle while they were on patrol duty during the Vinayaka immersion festivities. The accident occurred around 1:00 AM on Thursday on the Khammam-Warangal National Highway, near Bhavani Hotel in the vicinity of Thirumalayapalem. The police vehicle was struck from behind by the lorry, injuring both SI Jagadeesh and the private driver, Rakesh. The injured were immediately shifted to Stambhadri Hospital in Khammam town for treatment. While SI Jagadeesh sustained injuries, driver Rakesh suffered severe head injuries; doctors have stated that his condition is critical. Upon learning of the accident, Thumburu Dayakar Reddy in-charge of the camp office of Telangana Minister for Revenue, Housing, and Information, Ponguleti Srinivasa

Reddy visited Stambhadri Hospital to inquire about the well-being of SI Jagadeesh and driver Rakesh. He subsequently spoke with the doctors to ascertain the health status of the injured. He urged the hospital doctors and staff to take all necessary measures to provide the best possible medical care. Upon learning that the driver, Rakesh, was in critical condition, Thumburu Dayakar Reddy suggested transferring him to a higher-level hospital for advanced treatment if required. "Subsequently, he met Rakesh's family members and offered them words of comfort and encouragement. He assured them that the party would stand by the family in every possible way and stated that the condition of the injured would be continuously monitored to ensure they receive quality medical care.

Page 1 Contd... in the past, he has worked in party organizational strengthening in many states. He has worked. He has also handled the affairs of Telangana and West Bengal in the past. He supervised. With this, he has two new appointments. "The delegation of responsibilities to the states has become a priority. On the soil of Bengal Sunil Bansal's strategies in hoisting the saffron flag for the first time BJP 207 seats in 2026 West Bengal Assembly elections It won It needs 148 seats to form the government in the 294-seat assembly. While seats were needed, BJP won more seats than that. Trinamool Congress is limited to 80 seats. With this, BJP has won for the first time in Bengal. formed the government. In the wake of the BJP's results in Bengal There was a discussion within party circles on Sunil Basal's organizational strategies. However Rather than concluding that the election results were due to the strategy of a single leader Party campaigning, local leadership, candidate selection, central leadership There are many aspects like propaganda. Under the leadership of Sunil Bassal in Bengal BJP focuses on expanding its organizational structure to the booth level Put in place. To make party workers work actively within the polling stations Doing, identifying local issues, and directly connecting with voters Issues such as increasing the number of voters are part of the election management process. Candidate selection, local political equations, party by region Data-driven in areas such as force analysis and campaign management BJP used policies. In this process, Sunil Bansal along with Many national and state level leaders carried out their respective responsibilities. Sunil will also take charge of Telangana affairs while continuing to be responsible for Bengal. "Bansal will supervise. He will be assisted by Ajay Patil and Rekha. "With Sharma's appointment, the party's organizational activities in the state will be further strengthened. There is a possibility of coordinating. On the appointment of Sunil Bansal Telangana BJP President N. Ramachandra Rao expressed his congratulations. "Working with the leadership to further strengthen the party across the state He stated that they will work. Union Minister G. Kishan Reddy, Central Assistance "Minister Bandi Sanjay Kumar also congratulated Sunil Bansal the new co-incharges As part of the BJP's organizational changes, several states New Incharges and Co-Incharges appointed. Arvind for Andhra Pradesh Bhagouria has been appointed as in-charge and Vanathi Srinivasan as co-in-charge Uttar Pradesh's Vinod Talle.. Maharashtra's Vyjayant Jai Panda Leaders like Ram Madhav for Tamil Nadu and Tarun Chugh for Gujarat will be given responsibilities Handed over Sunil Bansal to continue in Telangana, two co-incharges The appointment is now an important part of the state BJP's organizational affairs It has become an evolution.

Disagreements Within The Central Election Commission? Officials denied The news. "All decisions on 'Sara' are unanimous" EC Gyanesh Kumar's key statement

Nathari venkatesh National bureau Chief New Delhi September 24. : Don't have any doubts about it. "Remove Gyanesh Kumar Arrest him immediately Opposition demands on Sir controversy" The EC has clarified that all the decisions taken by the Election Commission, including the Special Comprehensive Amendment (SCA) regarding the revision of the voters' list, were taken unanimously. The EC has denied reports that two Election Commissioners have expressed objections on record on several decisions. It was rejected. It was stated that the two commissioners only expressed their views on certain issues, which were considered by the commission. A recent 'Indian Express' article On at least 14 occasions in the last ten months, Election Commissioners Sukhbar Singh Sandhu and Vivek Joshi have been questioned on various decisions It stated that they had raised objections. The article stated that they had raised objections on issues like taking decisions without their knowl-

edge, addition and deletion of voters' names. The Election Commission, however, denied these claims. According to EC sources.. Chief Election Commissioner Gyanesh Kumar The decisions were taken with the approval of Kumar and two other election commissioners. It was said that the decisions taken by the commission will be signed by three people. The rules state that if there is a difference of opinion among the commissioners, the majority decision will prevail. However, the other two, including 'Sir' The first page is coming.. "The EC has clarified that all decisions were taken unanimously. The EC's explanation has gained significance in the wake of criticism from the opposition parties over the matter. Opposition leaders have previously expressed concerns that the names of some voters may be missing from the list due to 'Sir'. The EC says that this process was undertaken to ensure the accuracy and integrity of the electoral roll. Another nationwide voter survey The list is in the process of

special intensive revision Chief Election Commissioner Gyanesh Kumar "Opposition parties say they are acting unilaterally The Central Election Commission He completely lost his reputation and credibility. They accused him of degrading him. Immediately remove the CEC from office, They demanded arrest. Their involvement in the SIR process Decisions were made without Two election commissioners in the last 10 months Objections were raised 14 times. "J. With the publication of the news agency article The opposition parties have targeted the CEC with rhetoric. They have accused Prime Minister Modi and Home Minister Amit Shah of obstructing the EC and stealing votes to win the elections. They have criticized the BJP, RSS and the Election Commission for colluding and committing treason. The Congress has criticized the EC as being run by some invisible force. It has said that all decisions taken without consensus and majority approval should be considered illegal. The CPM

has accused the EC of becoming a dictatorship under the leadership of CEC Gyanesh Kumar. It has alleged that many votes were removed from the voter list without considering the objections of the two election commissioners. It has demanded that Parliament sessions be convened immediately and the impeachment process of the CEC be initiated. On the other hand, former Bengal CM Mamata Banerjee has responded on the same issue. She said that it has now been proven that the BJP and the EC committed irregularities in the Bengal assembly elections.

Poverty Eradication By 2030... Telangana To Become A Developed Economy By 2033

Key Decisions To Accelerate The State's Development Agenda

Deputy Chief Minister Bhatti Vikramarka

Dayyala Meena State Bureau Chief Hyderabad September 24 : Strengthening TSDPS; setting up a dedicated PMU; formulating district development plans and seven sectoral growth labs; proposal for a government-GFST partnership. The state government is set to accelerate its development agenda with the goal of transforming Telangana into a poverty-free state by 2030 and the first state in the country to achieve a developed economy status by 2033. A high-level meeting, chaired by Deputy Chief Minister Bhatti Vikramarka, was held on Thursday to discuss the action plan required to rapidly achieve the state's long-term economic and social development goals. Secretaries of the Finance and Planning departments, along with other senior officials, participated in the meeting. S.P. Tuckerformer Chief Secretary of Andhra Pradesh and Hyderabad-based Vice Chairman of GFSTalong with other GFST representatives, attended the meeting held at the Deputy Chief Minister's camp office. Extensive discussions took place regarding strengthening the state's development planning and implementation mechanisms, enhancing inter-departmental coordination, and establishing systems for the continuous monitoring of development outcomes. Dedicated PMU for TSDPS: A decision was made to further strengthen the Telangana State Development Planning Society (TSDPS). As part of this initiative, a dedicated Project Management Unit (PMU) will be established. The PMU will handle responsibilities such as formulating strategic plans for the state's priority development programs, coordinating between various departments, and overseeing the

implementation, monitoring, and acceleration of these programs. Zero Poverty' by 2030 Special, targeted programs will be implemented to transform Telangana into a 'Zero Poverty' state by 2030. Measures will be taken to identify families vulnerable to poverty, coordinate the delivery of relevant government schemes and programs, and create sustainable livelihoods. A dedicated system will be established to monitor and measure the outcomes of poverty alleviation initiatives. Developed Economy by 2033. A strategy for rapid, focused development will be formulated to transform Telangana into a state with a developed economy by 2033. An action plan will be devised to leverage the state's strengths more effectively and capitalize on new opportunities for investment, innovation, employment, and inclusive growth. Sector-specific Expert Services It has been decided to utilize the services of experts and consultants with specialized knowledge across various sectors to enhance the institutional capacity of the state government. Technical and strategic support required to accelerate economic growth will be secured through these experts. Government-GFST Partnership A decision has been made to prepare a proposal for a Memorandum of Understanding (MoU) between the Telangana government and GFST. This partnership aims to facilitate strategic planning, data-driven decision-making, technology integration, knowledge support, capacity building, monitoring, and the accelerated implementation of key development programs. District-wise Development Plans The Deputy Chief Minister directed the formulation of

comprehensive district development plans to translate state-level development goals into measurable outcomes at the district level. Measures will be taken to ensure these plans incorporate data-driven dashboards, clear Key Performance Indicators (KPIs), measurable results, and budget alignment. This will enable continuous monitoring of district development progress, identification of gaps, and the implementation of timely corrective actions where necessary. Seven Sectoral Growth Labs Seven 'Sectoral Growth Labs' will be established to bring government departments, sectoral experts, industries, educational institutions, development agencies, and other key stakeholders onto a single platform. These growth labs will primarily focus on areas such as poverty alleviation, infrastructure and logistics, health, tourism, livestock and aquaculture, urbanization, and fostering a developed economy. The initiative aims to identify development opportunities, resolve implementation hurdles, formulate sector-specific strategies, and set time-bound priorities. The

primary objective of the 'Growth Labs' is to transform plans into actionable strategies with measurable outcomes. A comprehensive institutional framework for state development is being established through the strengthening of the TSDPS-PMU, the formulation of district development plans, the creation of seven sectoral Growth Labs, the engagement of sector experts, and a partnership between the government and GFST. This system will facilitate data-driven decision-making, a focus on results, and the implementation of development programs in 'mission mode.' It was clarified during the meeting that the core purpose of these decisions is to operationalize the state's development vision, thereby accelerating the achievement of goals such as poverty eradication by 2030 and the transition to a developed economy by 2033. Senior officials, including Finance Principal Secretary Sandeep Kumar Sultan and Secretary of the Finance and Planning Department Gaurav Uppal, participated in the meeting.

NSS Plays A Key Role In Youth Leadership Development“ KU Vice Chancellor Acharya K. Pratap Reddy

Shobharani Ramesh Kandala KU Campus September 24 : Vice-Chancellor Acharya K. Pratap Reddy said that the National Service Scheme (NSS) is playing a key role in developing leadership qualities, service spirit and responsible citizenship among the youth. As part of the Kakatiya University Golden Jubilee celebrations, NSS formation day celebrations were organized at the university auditorium on Thursday. The Vice-Chancellor attended the program chaired by NSS Program Samaswamy Adhikari Acharya Isam Narayana and spoke as the chief guest said that a wide range of programs are being organized in the fields of community service, environmental conservation, health, education, cleanliness and leadership development with more than 360 NSS units and about 35 thousand volunteers within the university. He said that NSS volunteers are providing services in the rural and urban areas according to the needs of the people and are developing the spirit of service and leadership qualities among the students. The organization through KHub He said that they are creating awareness on entrepreneurship, startups and innovations and that permanent infrastructure has been provided to

NSS with the help of former Member of Parliament Acharya Ajmer Sitaram Nayak. NSS Program Sama Swaya Adhikari Acharya Isam Narayana said that Kakatiya University NSS has won many awards and honours at the state and national levels. Former NSS Officer and former Member of Parliament Acharya Ajmera Sitaram Naik said that NSS has been a platform for crucial opportunities in his life and has increased his responsibility towards public service. NSS“ He said that he would cooperate in the construction of the Bhavan. Telangana Academy Chairman and former NSS Coordination Officer Acharya Kurapati Ven Katanarayana said that the services of NSS volunteers in big programs like Medaram Samma Kkasaralamma Jatara are special. Kakatiya University Registrar Acharya V. Ramachandram said that the university is organizing various programs for the skill, personality and mental development of students. On this occasion, the song 'Seva Kulam' composed by former NSS volunteers was unveiled. Former NSS Esam Swamy officers, program officers, volunteers, current officers and volunteers were felicitated with shawls and mementos. Campus College Princi-

pal Acharya Manohar, Engineering College“Principal Acharya N. Ramana, former NSS Esam swamy officers Acharya G. Balaswamy, Acharya M. Kishtiaiah, Acharya B. Suresh Lal, Acharya Sunkari Jyoti, program officers, NSS volunteers and others participated.

Ayurveda An Integral Part of Vedic Culture Ancient Wisdom, Healthy Living and the Agricultural Heritage of India

Nandanam Krupakar State Honorary President Working Journalists of India, Telangana

Dayyala Rakesh Bhanu State Bureau Chief Hyderabad September 24 :

Ayurveda is not merely a system of medicine. It is an integral part of India's ancient knowledge traditions, reflecting a holistic understanding of life, health, food, nature and human well-being. For generations, Indian sages and scholars developed principles of healthy living that emphasized harmony between the individual and the natural world. The wisdom of Ayurveda was closely connected with the broader values of Indian culture. Health was understood not simply as the absence of disease, but as a balanced relationship between body, mind, food, daily conduct, seasons and the environment. Today, as society faces lifestyle-related health challenges, environmental pollution and concerns about food quality, the valuable principles of traditional knowledge deserve renewed attention, careful study and responsible application. The Wisdom of the Ancient Sages Long before modern concepts of preventive health became widely discussed, Indian Ayurvedic traditions emphasized the importance of maintaining health through proper food, disciplined living and seasonal awareness. The principles of Dinacharya daily routine and Ritucharya seasonal living reflect the importance given to adapting our lifestyle to the rhythms of nature. Ayurveda encouraged appropriate food habits, personal hygiene, physical activity, adequate rest and a balanced lifestyle. The underlying message was profound: A healthy life begins with disciplined habits, wholesome food and harmony with nature. Great Ayurvedic Scholars and Their Classical Works India's Ayurvedic heritage is enriched by the contributions of great physicians, scholars and teachers whose works have been preserved across generations. Their writings laid important foundations for the development of Ayurvedic knowledge. Acharya Charaka Charaka Samhita Acharya Charaka is traditionally associated with the Charaka Samhita, one of the foundational works of Ayurveda. The text is particularly associated with internal medicine, diagnosis, prevention and principles of healthy living. It discusses the importance of maintaining health and understanding the causes and management of disease. The Charaka tradition reminds us that health requires attention not only to treatment but also to lifestyle, food and prevention. Acharya Sushruta Sushruta Samhita Acharya Sushruta is renowned for his contribution to Ayurvedic surgery. The Sushruta Samhita contains extensive discussions of surgery, anatomy, medical procedures and treatment. It is one of the most important classical works in the history of Indian medical knowledge. Sushruta's legacy demonstrates that ancient Indian scholars made significant contributions

to the systematic study of medicine and surgical practice. Acharya Vagbhata Ashtanga Hridaya and Ashtanga Sangraha Acharya Vagbhata is associated with two major classical works: Ashtanga Hridaya and Ashtanga Sangraha. His writings brought together important aspects of earlier Ayurvedic traditions and presented them in a systematic and practical form. The Ashtanga Hridaya remains one of the principal classical texts of Ayurveda. Acharya Madhavakara Madhava Nidana Acharya Madhavakara is traditionally associated with Madhava Nidana, an important work dealing with the diagnosis and identification of diseases. The text has played a significant role in the development of Ayurvedic diagnostic knowledge. Acharya Sharngadhara Sharngadhara Samhita Acharya Sharngadhara authored the Sharngadhara Samhita, a classical Ayurvedic work known for its discussions of pharmaceutical preparations, formulations and related subjects. It represents the continuing development of Ayurvedic knowledge through later generations of scholars. Acharya Bhavamishra Bhavaprakasha Acharya Bhavamishra is associated with Bhavaprakasha, an important classical work describing medicinal substances, herbs, foods and various aspects of Ayurveda. The text is especially valued for its discussion of medicinal plants and substances used in Ayurvedic traditions. Other Important Ayurvedic Traditions The history of Ayurveda also includes scholars and traditions associated with Kashyapa, Bhela and Harita, whose works contributed to the development of Ayurvedic knowledge. These scholars and their classical texts represent a rich intellectual heritage that deserves preservation, research and responsible understanding. Their contribution reminds us that Ayurveda developed as a broad knowledge tradition, not merely as a collection of medicines. Agriculture An Integral Part of Our Culture Agriculture has always been closely connected with Indian civilization. For generations, farming shaped our villages, festivals, food habits, livelihoods and social relationships. The farmer was not merely a producer of food; agriculture was deeply connected with community life and the preservation of natural resources. Traditional farming knowledge developed through close observation of soil, rainfall, seasons, crops, water and local ecosystems. The relationship between soil, seed, water, cattle, farmer and food formed an important part of the traditional rural economy. Our ancestors understood that the prosperity of society depended greatly on the fertility of the land and the availability of nutritious food. From Healthy Soil to Healthy Society The connection between agriculture and health deserves renewed

attention. Nutritious food depends on healthy soil, adequate water, responsible cultivation and appropriate food choices. Therefore, protecting agricultural land and maintaining soil fertility are important investments in the well-being of future generations. Traditional agricultural practices, including natural resource conservation and the use of locally adapted crops, offer valuable subjects for scientific study. At the same time, modern agriculture has contributed greatly to food production. The way forward should combine scientific progress with responsible management of soil, water and biodiversity. Our goal should be a responsible synthesis of traditional wisdom and modern scientific knowledge. Food Is the First Foundation of Health Indian households have traditionally used a wide variety of grains, pulses, vegetables, fruits, herbs and spices. Ayurvedic traditions give considerable importance to food and dietary habits. The message for today's society is to understand the value of balanced nutrition, moderation and healthy eating practices. A healthy society cannot be built only through hospitals and medicines. Prevention, nutritious food, physical activity, sanitation, mental well-being and a healthy environment must also receive importance. Let us encourage our families to adopt healthy food habits and help children understand the importance of nutrition and agriculture. Protect Nature Protect the Future The ancient Indian worldview emphasized the relationship between human beings and nature. Clean air, pure water, fertile soil, nutritious food and a healthy environment are fundamental to human well-being. Today, pollution, soil degradation, water scarcity, loss of biodiversity and unhealthy lifestyles present serious challenges. Protecting rivers and water bodies, conserving soil, planting and protecting trees, reducing waste and supporting sustainable agriculture are responsibilities towards future generations. The health of human beings, the health of agriculture and the health of nature are deeply interconnected. Ayurveda and Modern Science Returning to our roots does not mean rejecting modern progress. It means identifying the valuable principles of our heritage, studying them scientifically and applying those that are relevant to contemporary life. Ayurvedic knowledge should be preserved and researched responsibly. Traditional remedies and practices should not automatically be considered cures for every disease. Appropriate medical advice and evidence-based treatment remain important. Modern science and traditional knowledge can complement one another when their strengths are understood and their limitations are respected. Preserve the wisdom. Promote research. Adopt healthy

practices responsibly. Let Us Return to Healthy Habits Let us encourage: Healthy and balanced food habits. Seasonal and locally appropriate diets. Regular physical activity and yoga. Adequate sleep and personal hygiene. Responsible use of traditional knowledge. Sustainable and soil-friendly agriculture. Protection of water, forests and biodiversity. Reduction of unnecessary pollution. Greater awareness of preventive health. Let us also encourage young people to understand where their food comes from, respect farmers and appreciate India's traditional knowledge systems. A Strong Public Appeal Let us not allow our traditional knowledge to remain confined to books, museums and ceremonial speeches. Let us study Ayurveda responsibly, protect our agricultural heritage, conserve natural resources and adopt healthy lifestyles. Let every household become conscious of food and health. Let every farmer be respected as a partner in building a healthy society. Let every citizen understand that the health of the soil, the quality of food and the well-being of human beings are closely connected. Ayurveda teaches us to live in harmony with nature. Agriculture connects us to the soil. Indian cultural traditions remind us of our responsibility towards life and the natural world. Preserving these values is not simply about remembering our past. It is about building a healthier, more sustainable and culturally conscious future. Conclusion Ayurveda and agriculture are not merely chapters of our ancient past. They are important parts of India's knowledge heritage and can inspire responsible approaches to health, food, farming and environmental protection. From the great Ayurvedic scholars to the farmers who nourish our society, India's heritage reflects the importance of knowledge, discipline, nature and service. Let us respect our roots, embrace scientific progress, protect our farmers, preserve our natural resources and work together for a healthier India. Healthy individuals. Healthy families. Healthy agriculture. Healthy society.

When Will There Be Changes In The Indian Education System?

Dayyala Dinesh Chander

When comparing our education system with other countries, there is a need to analyze the actual situation. Changes should be made in the education system in line with the changing times. What is the real meaning of education? Education is not just about reading books, writing exams, scoring marks, and getting degrees. Education is a process that develops thinking power, knowledge, skills, moral values, and responsibility towards society in a person. A strong education system is essential for the development of a country. However, if despite the development in the education system, the educated youth are not getting suitable jobs, then there is a need to examine the education system comprehensively. Every year, lakhs of students in India complete their schooling and enter higher education. The number of those joining engineering, degree, PG, management, medical, law and other professional courses is significant. However, getting a job commensurate with their educational qualifications is becoming a challenge for many youth. There are many reasons for this, such as the quality of education, industry needs, economic conditions, skill shortage and job creation. Increase in degrees.. Lack of jobs. The expansion of higher education in India is a positive development. Expanding educational opportunities pave the way for social development. But there is no guarantee that a student will get a suitable job immediately after obtaining a degree. The International Labour Organization, IL, in its India Employment Report 2024, analyzed the issues related to employment of Indian youth. Despite the increasing educational levels among the youth, and the match between educational qualifications, skills and job market needs is discussed as an important issue in the report, some of the youth who have completed their education are joining jobs unrelated to their education. Others are acquiring the skills required for the job only after taking additional training. Others have to wait for a long time to get a job. This situation affects not only the personal lives of the students but also the financial conditions of the families. Lessons to be learned from education policies of other countries. Different countries of the world have designed education policies according to their economies, social needs and development of industries. One size does not fit all countries. However, India can im-

prove its education system by studying the experiences of other countries. Data from the Organization for Economic Cooperation and Development (an international organization) shows a generally positive relationship between higher education level and employment opportunities. However, the relationship is not the same in every country. The quality of education, economic growth, nature of industries and job market conditions also affect employment. In countries like Germany, vocational education and apprenticeship policies have a special importance. Students get opportunities to receive training in a real-world environment along with classroom learning. Through this, they can understand the responsibilities, performance standards and industry requirements in advance. India also has ITIs, polytechnics, skill development programmes and apprenticeship schemes. However, these need to be developed more widely, qualitatively and in line with the needs of the industry. How useful is education? In many cases, in our education system, test results are becoming the main measure of a student's talent. Getting good marks is a recognition of a student's hard work, but marks alone do not reveal his full potential. The world of work requires skills such as solving problems, working in a team, communicating, using technology, learning new things and making decisions according to the situation. Students need to learn how to apply that knowledge in life in addition to memorizing information from books. Laboratories, projects, research, industry visits and practical training can make education more useful. Where should the skills needed by industries come from? Modern industries are changing rapidly. Artificial intelligence, automation, data analysis, cyber security and digital technologies are many. The nature of jobs is changing. Educational institutions need to evolve their teaching methods, curricula and training approaches to accommodate these changes. Students need to be made aware of the skills required by industries. It is not enough to start job training only in the final year of college. The problem needs to be solved from the school level, with emphasis on basic digital skills, communication, teamwork and career awareness, and to bring social respect to vocational education. In

India, many families see traditional degrees as the only path to higher education, but there are situations where medical, engineering or other degree courses are given more priority. However, not every student has the same interest, ability and future goals. Electrician, Fitter, Welder, Machine Technician, Health There is also a great need in society for service assistants, automobile technicians, construction specialists and other technical professions. A culture of respect for vocational education should be fostered, rather than seeing it as a low-level education. Vocational education should provide quality training, modern equipment, industry linkages and suitable employment opportunities and improve the situation of rural students. Although educational opportunities in rural India have expanded compared to the past, challenges continue in some areas in terms of infrastructure, availability of teachers, laboratories, libraries and internet. In urban areas, students may have more opportunities for additional training, career guidance and exposure to industries. If these opportunities are not equally available to rural students, educational inequality can turn into employment inequality. Therefore, digital facilities, teacher training, career guidance and practical education should be strengthened in rural schools and colleges. Women's education-employment gap While the increase in women's educational level is an important indicator of the social progress of a country, it may not be the case that every educated woman can enter the job market. Factors such as family responsibilities, childcare, security, travel facilities, equal opportunities in the workplace and work-life balance affect women's employment. Therefore, it is not only necessary to provide education to women, but also to develop a safe and equal employment environment that is compatible with their skills. Digital education is an opportunity.. but also a challenge. Online classes, digital books, educational apps and virtual laboratories are new ways for students to learn. Opportunities are being offered. Many education systems around the world are using technology to enhance learning. However, not every student has equal access to digital devices, the internet, and educational resources. So while technology can bridge the education gap, it can also create new gaps if the right policies are not

in place. Along with digital education, teachers' direct guidance, discussions, practical training and individual needs of students should also be taken into consideration. Responsibility of government, educational institutions and industry. Bringing about changes in the Indian education system is not the responsibility of the government alone. The government should formulate policies and provide resources. Educational institutions should provide quality teaching and training. Industries should provide internships, apprenticeships and real work experiences to students. Parents should also encourage the development of their interests, abilities and skills, rather than just putting pressure on their children for marks and degrees. While evaluating the education system, it is necessary to consider not only the pass percentage but also the skills of the students, job linkages, quality of employment, income opportunities and social development. Because India is a country with a young population. This youth power can become a great opportunity for the economic development of the country. However, for this, the education system should be effectively linked to the needs of the job market and the increase in degrees should not be a complete indicator of development, but also when the knowledge, skills, creativity, moral values ??and responsible citizenship of the students are increased. Then suitable job opportunities and careers for them. When mentoring provides continuous skill development. We need to learn from the experiences of other countries and connect the important aspects of education with real life and the world of work. But the circumstances of each country are different. India needs to design education reforms according to its population, rural-urban diversity, economic needs and social realities. The real question facing the Indian education system is not just "How many have obtained degrees?" but "How many of the educated youth are getting opportunities that match their skills?" Giving a certificate to a student should not be the end of the educational journey. Education should give him the power to think, the skills to work, the confidence to live and the ability to develop society. From degree to skill, from skill to employment.. from employment to national development, this should be the future direction of the Indian education system.

Shocking Incident in Kazipet: Heartless Son Kills Mother in Balaji Nagar

Duvva Venu Reporter Kazipet September 24 "Kazipet: A horrific incident occurred on Road No. 8, Balaji Nagar, within the Kazipet limits of Hanumakonda district. A heartless son took the life of the mother who gave birth to and raised him. This incident has caused widespread shock and panic in the locality. According to information provided by locals and the police, the details are as follows: Personal disputes and misunderstandings had arisen within a family residing on Road No. 8, Balaji Nagar, Kazipet. A heated argument

broke out between the mother and her son. Overcome by rage as the altercation escalated, the young man ruthlessly killed his mother. Witnesses were left stunned that a son could commit such a heinous act in a fit of momentary anger. Upon receiving the information, Kazipet police arrived at the scene, took possession of the body, and shifted it to the hospital for a post-mortem examination. A case has been registered, and an investigation is underway; it is reported that the accused has been taken into custody. Residents of the Balaji Nagar area

have expressed deep shock over this brutal incident that has shattered the sanctity of family bonds.

Does Registering a Case Mean that the Crime has been Proven?

Direct Voice State Bureau Chief Hyderabad September 24 :

Myths and facts about POCSO: Accused or innocent? The weighing of facts in POCSO cases "Childhood is a world of weightless laughter and fear, children should feel safe whether in their mother's lap, in their father's arms, in the schoolyard or among their friends. But as incidents of sexual crimes against children come to light, questions are being raised about that safety. In this context, 'POCSO' cases are frequently seen in the news. However, it is the responsibility of society to see a fact behind every case, an investigation process behind every allegation, and a future behind every child. The 'Protection of Children from Sexual Offences' Act, which came into force in 2012 to protect children from sexual crimes, is referred to as the POCSO Act. Children under the age of 18 are considered children under the scope of this Act. This Act specifically defines crimes such as sexual assault, sexual harassment, and using children for pornographic purposes. The Act also makes special provisions for testimony, medical examination, investigation, and special courts in accordance with the protection of children. "The latest available official 'Crime in India-2023' statistics are an important basis for understanding the severity of the problem. 67,694 cases were registered under the POCSO Act across the country in 2023. However, it is completely wrong to interpret this number as 'that many criminals'. Registration of a case is only the beginning of the legal process on the allegation; there are further steps like investigation, collection of evidence, charge sheet, trial, and judgment. Moreover, the statistics of the crime are based on the information provided by the states and union territories. Therefore, the official statistical system makes it clear that the severity of crime should

not be compared between states based only on the number of cases. "Here, an important misconception needs to be dispelled. It is not true that a crime is proven if a POCSO case is registered. The person facing the charge remains a suspect in law until he is found guilty. At the same time, the fact that a complaint has been registered does not mean that it is false. Every complaint must be investigated legally and impartially. Evidence, investigation, and judicial review are what determine the truth. "The misconception that "just because a child knows the accused doesn't mean it's a crime" is also dangerous. In 2023 statistics collected by Chijanadi, POCSO "WHAT IS POCSO ACT?" "The accused-victim relationship has been recorded in the cases. This means that there are cases where people known to the children are also accused in the cases. On the contrary, it is also incorrect to conclude that 'every acquaintance is dangerous'. Relationship alone does not determine the crime; the facts, evidence and legal standards related to the incident are decisive. Another sensitive issue is the background of love, marriage promise, family opposition, personal conflicts, in some cases such factors may appear as the background of the allegations, some allegations may not stand up in the investigation and need to be examined. In others, the crime is proven. Therefore, it is not a legal approach to say that the allegation is fabricated just because there is a family dispute, or that a sexual offence did not occur just because there was a love affair. Each case should be judged on its own independent facts. The same caution is necessary in the context of the Telugu states. Cases related to POCSO are being heard in special courts in Telangana and Andhra Pradesh. The Telangana High Court judgments have recorded many aspects such as cases reg-

istered under the POCSO Act, appeals of the accused, arguments on evidence, and judgments of special courts. Cases related to the POCSO Act also appear in the judgments of the Andhra Pradesh High Court. However, it is not right to consider the judgment of each court as representative of the situation of cases in the entire state. The real question is why are cases being registered? Not only that; "What should be done in advance to prevent children from being in danger?" What is important is that there should be friendly conversations with children at home. Awareness should be provided in age-appropriate language about personal boundaries related to the body, inappropriate touching, and uncomfortable behavior. Instead of the concept of "someone is an adult. So you have to trust them", children should be taught that they have the right to say 'no' if they feel uncomfortable. An environment should be created where they can tell their parents, teachers, or trusted adults without fear if any incident occurs. The responsibility of schools is more crucial, there should be appropriate rules, supervision and complaint system for teachers, bus staff, hostel staff, sports coaches, and other people who work with children. Child safety policies should be implemented and not limited to papers. Alone with children "POCSO ACT" "It is imperative to follow transparent procedures in dealing with cases and to respond legally when a complaint is received without hiding it. "When an incident is suspected, the first thing parents should do is not to blame the child, but to listen. Questions like "Why did you go there?", "Why didn't you tell me earlier?" can make the child more afraid. Repeatedly asking the same question can affect the child's testimony. Therefore, trained 4 officers, medical personnel. The cooperation of child protection sys-

tems should be sought. If there is an immediate danger, the police or relevant child protection authorities should be contacted. "Social media is creating another danger. Once a case comes to light, sharing photos of the accused, details of the victim boy, school name, family details, and unverified allegations on social media can cause serious damage to the victim's future. It is everyone's responsibility to protect the child's dignity and privacy. News organizations should also prioritize factual findings over sensational headlines. Another balance is needed in the discussion on POCSO cases. False allegations cannot be completely ignored; at the same time, the voices of real victims cannot be silenced in the name of false allegations. Justice is not about blaming someone; it is about providing legal due process through evidence to establish the truth. This is the basic principle of the judiciary. : To uncover and protect the victim, and to protect the accused as well. Childhood is a green shoot. Even if the injury inflicted on it is not visible to the eye, it may remain in the mind. That is why the POCSO Act should not be seen as a mere punitive law but as a social security shield for the protection of children. Every case registered should not be seen as a sensation but as a responsibility. The allegation should not be judged as true in advance; it should not be rejected as false in advance. The child should be listened to, the evidence should be respected, the law should be followed, and confidentiality should be protected. Only if the family is vigilant, the school acts responsibly, the authorities respond sensitively, and the society chooses understanding instead of misconceptions, will childhood be truly protected. "Future India is safe" is what needs to be shown in action "Pocso Act

'Skill Mapping' For Foreign Jobs

Dayyala Meena National Bureau Chief New Delhi September 24:

"The goal is to provide job opportunities for Indian youth worldwide." Skill training tailored to the needs of nearly 20 countries "There is a huge need for human resources in the conservation and construction sectors. To turn India's demographic advantage into an opportunity, the Centre has selected India to compete in 63 categories in the Shanghai World Skills Competition. The Union Ministry of Skill Development and Entrepreneurship has taken steps to further expand employment opportunities for youth abroad. It has focused on the process of linking domestic training policies in accordance with the job requirements and skill standards of various countries of the world. The ministry's Senior Economic Advisor Manisha Sen Sharma revealed that efforts are being made to provide training to Indian youth in accordance with the job standards and skill requirements of about 20 countries. She said that the demand for skilled workers is increasing in many countries of the world due to the increasing elderly population and decreasing human resources of working

age. She said that to turn this situation into an international employment opportunity for Indian youth, the focus has been on designing curricula and training policies in accordance with the job standards of those countries. To suit the needs of 20 countries.. Manisha Sen Sharma explained that efforts are being made to identify factors such as which sectors have the most job opportunities abroad? What skills are required for those jobs? What standards do the industries there demand? and link them with domestic skill training. He said that this process has been undertaken with about 20 countries in mind. He said that the main purpose of this process is to prepare domestically trained youth with skills that match the job standards of those countries, without the need for them to undergo special training again after going abroad. Demand in the construction sector.. She said that there is a shortage of human resources in many jobs that require skilled and semi-skilled jobs, especially in caretakers and construction workers, worldwide. She said that there are opportunities for Indian skilled workers in many countries, in-

cluding the UAE. She said that this will become a key opportunity for India, which has a large youth population at a time when many developed countries are facing the problem of aging population. She said that if the country's youth can be provided with skills of international standards, India has the potential to emerge as a key human resource center in the global job market in the coming years. Battle of the skills in Shanghai On the other hand, the 48th World Cup will be held in Shanghai, China. The skills competition has begun. India has fielded its largest team in its history in this international competition to be held from September 22 to 27. 70 young Indian talents are competing in 63 out of a total of 64 skill categories. This time, India is competing in 11 new skill categories for the first time. Indian youth are showcasing their skills for the first time in the categories of dental prosthetics, digital interactive media design, intelligent secu-

rity technology, landscape gardening, optoelectronic technology, retail sales, unmanned aerial systems, industrial mechanics, software testing, heavy vehicle technology, and aircraft maintenance. A total of 1,385 young professionals from 68 countries and regions are competing in 64 skill categories in the Shanghai competition. The opening ceremony was held on September 22, while the main competitions will continue from 23 to 26 and the closing ceremony will be held on the 27th. The Union Ministry of Skill Development states that steps are being taken to transform India into a global hub of skilled human resources by training the youth in line with the needs of domestic industries as well as international job market standards.
